

Do you know that a fully protected 3-phase motor does exist? No need for any additional motor protection. No need for an electrician. **YOU SIMPLY CONNECT THE CABLE AND SWITCH ON THE PUMP.**

You should not worry about any other protection or control panel. You do not waste your valuable time installing any other protection and you do not waste your money - ZDS's DRP motor is less expensive and more easily fitted than any other type of protection.

ZDS has achieved a **TECHNOLOGICAL BREAKTHROUGH** which in a few years will be the industry standard solution...just as the CD replaced vinyl records and the DVD squeezed out the VHS cassettes.

FULLY PROTECTED 3 PHASE MOTOR ...TOTALLY NEW WORLD! TWO DIFFERENT WORLDS.

WHICH IS YOURS?

All other 3 phase submersible pumps

- Complicated Installation
- Time Consuming & Costly

ZDS 3 phase DRP submersible pumps

- Easy Installation & Reliable
- Quicker & Cost Effective

ZDS 3 phase submersible pump is factory-protected against:

OVERLOAD

Low Voltage

Phase imbalance

Phase Loss

Incorrect phase sequence

Thermal Protection

High Voltage

Dry-running

Please contact us at marketing@zdsgroup.com or www.zdsgroup.com/partner if you want more information about the REVOLUTIONARY Pump Protector – DRP.

Happy Pump Selling!
ZDS Team
